# PIP INTERNATIONAL: CELEBRATING MILESTONES AND LOOKING TO THE FUTURE

**W**e are excited to share significant progress and milestones achieved by our company in the commissioning phase of our ground-breaking project: the development of a new type of pea protein, Ultimate Pea Protein isolate (UP.P™). As we continue to push the boundaries of innovation, sustainability, and nutritional excellence we want to provide you with a comprehensive update on our journey so far.

equipment, water-usage reduction systems, and waste-reduction processes.

### **Milestone 2: Sustainable Farming Practices**

Central to our mission is sustainability, and we're proud to report that our commitment extends to the very roots of our operation. Our pea protein is sourced from farms that adhere to regenerative agricultural practices, minimizing soil erosion, conserving water, and promoting biodiversity. By working closely with local and regional farmers, we're not only ensuring a steady supply of high-quality peas but also contributing to the prosperity of the communities we operate in and around.

### **Milestone 3: Advanced Protein Extraction Techniques**

One of the key innovations driving our project is the development of advanced protein extraction techniques. These methods allow us to obtain the purest form of pea protein while preserving nutritional and functional integrity. The result is a protein with enhanced solubility, a smoother texture, and a superior taste profile compared to conventional pea protein.

### **Project Overview:**

Our journey began with a vision: to create a plant-based protein that not only meets but exceeds industry standards in terms of quality, functionality, and sustainability at an affordable price. Traditional pea protein has long been celebrated for its plant-based, hypoallergenic, and environmentally friendly attributes. However, we saw an opportunity to refine and elevate this protein source to new heights, including taking away the off-putting taste, colour, and odor that is generally associated with pea protein.

### **Milestone 1: Cutting-Edge Processing Facility**

We are thrilled to announce that we are in final commissioning steps of automating our state-of-the-art processing facility. Located in the heart of our pea-protein cultivation region, this facility is designed to maximize efficiency while minimizing environmental impact. It incorporates the latest advancements in sustainable manufacturing, including energy-efficient

### **Milestone 4: Uncompromising Quality Assurance**

Quality assurance is at the core of our operations. Our team of experts rigorously test throughout the production process to ensure it meets the highest quality of standards for purity, safety, and nutritional value. We're proud to report that our product consistently surpasses industry benchmarks. In addition, we have several 3rd party labs that verify and monitor our results. Trust but validate!

### **Looking Ahead**

While we celebrate these achievements, we recognize that our journey is far from over. In the coming months we will focus on optimizing production, capacity expansion, and engaging with partners and consumers to ensure that our pea protein reaches those who seek sustainable, nutritious, and plant-powered solutions.

We want to express our deepest gratitude to our dedicated team, our committed partners, and our supportive investors who have been instrumental in bringing this vision to life. Together, we are not only pioneering a new era in pea protein but also contributing to a healthier, more sustainable future for our planet.

We invite you to stay connected with us as we embark on this exciting phase of our journey. Your continued support and enthusiasm are invaluable as we work towards a more sustainable and nutritious world.
